Server Arts presents *hybrid hosting*, a solution breaking the barriers of traditional dedicated web and application server hosting. We fused together a dedicated **MS[®] Windows 2000** server with the best elements of shared managed hosting (on our own shared servers) to create the most unique offering in the industry.

introducing the "art of hosting" in 4 simple steps

1. terms and conditions

- month-to-month contracts
- absolutely no set-up fees
- 10-day money-back guarantee

2. technical support

- 24x7 phone support-live engineers
- no help-desks, no support tickets
- all engineers Microsoft[®] certified

3. free hosting features

- browser-based remote reboot
- mail & web messaging/calendaring
- 100 MB MS[®] SQL 2000 database
- browser-based live statistics
- server monitoring & alerting

4. infrastructure

- global Tier-1 network
- 3-way redundant Internet backbone
- state-of-the-art data center
- high capacity pipes & CIR
- Intel[®] Pentium III and 4 servers

If the dedicated host you are considering charges you **set-up fees**, forces you into a **long-term contract** or doesn't offer you **24x7 direct phone** access to a dedicated certified hosting engineer, you are just getting some overpriced space on a rack. Tired of so-called "managed" programs with inflated fees and access constraints? Discover the freedom of full administrative access to your very own server. Our unconditional **money-back guarantee** makes hosting with Server Arts a risk-free proposition. Can your host do that?
